

MARTIN ENGINEERING STRESSES COMPLIANCE WITH THE VOICE OF THE CONVEYOR INDUSTRY OF THE AMERICAS CEMA MEMBERS IN THE NEWS

March—April 2018

OSHA's SILICA DUST DEADLINE

In a move to help all silica dust-producing operations comply with impending rule changes, a pioneer in industrial dust control is reminding companies that the Occupational Safety and Health Administration (OSHA) respirable crystalline silica (RCS) dust emissions Final Rule [[OSHA §1919.1000 Respirable crystalline silica](#)] compliance deadline for general industry and maritime is **June 23, 2018**. Martin Engineering helps operators safeguard the health of individuals by emphasizing the use of field-proven equipment as part of an engineered control system to minimize dust, forced downtime and potential fines.

Martin Engineering
Dust Cleaner.

Serving customers from mining, aggregates, cement manufacturing to ports and shipping, workplace safety has always been a priority for the company. “We believe dust control doesn’t need to come at the expense of production or profits, but should support operations and deliver a return on investment,” explained Jerad Heitzler, Foundations™ Training Manager at March Engineering.
