

**2023 CEMA ANNUAL MEETING**  
**CONVEYOR SYSTEMS INTEGRATOR'S "AD HOC" COMMITTEE MEETING**

The Scottsdale Resort at McCormick Ranch. Scottsdale, AZ

Monday, March 13, 2023 – 7:30 am

**AGENDA**

1. Call to order.
2. Attendance and Introductions.
3. Approval of Minutes of September 21, 2022 (Attached).
4. Review of Conveyor Systems Integrator (CSI) membership addition (Whom to target?)
5. Discussion of CSI expectations from CEMA – Updates
  - Conveyor Systems Integrators are more exposed to end users' "pain points" and can serve as a "Voice of the Customers" to component suppliers and manufacturers. Also, have earlier visibility of end users' emerging needs.
  - How to communicate important and relevant safety and maintenance information to their customers.
    - Final warehouses do not have staff who know how to maintain or repair these components.
    - Seeking a curation of the relevant safety systems, to avoid wading through reams of regulations.
6. Brainstorm CSI CEMA statistical reporting and objectives – Updates  
Integrators sell other things, mentioning that separating conveyor data will be challenging. Discussion about specific statistical reporting will continue at this meeting.

The number of members to report statistics should be about ten (10).

7. Future Meeting Goals – Updates
  - Perhaps an integrator case study of an anonymous customer to shed light on components/accessories needed that the integrator couldn't find or had to build in-house.
  - Discussion to find a common way to interpret customer specifications.
  - Reliability measures of end users.
  - Communication best practices through installation.

CONVEYOR EQUIPMENT  
MANUFACTURERS ASSOCIATION

27400 Riverview Center Blvd, Suite 2  
Bonita Springs, Florida 34134

Tel: (239) 514-3441

Fax: (239) 514-3470
